Assignment overview

If your Bug report is effective, then its chances of getting fixed are higher. So fixing a bug depends upon how effectively you report it.
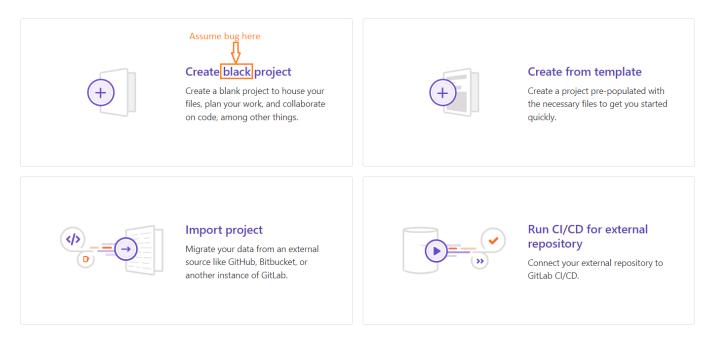

Bug Overview

The example application GitLab. We can create a blank project with the below URL
Create a new blank project: https://gitlab.com/projects/new#blank_project

Hypothetically **Let's assume** that one of the developers has changed the code and instead of text "Create blank project" he has done typo mistakes like "Create black project"

Please refer to below image **instead of blank = black**

Create new project

Assume bug here

Create black project

Create a blank project to house your files, plan your work, and collaborate on code, among other things.

Create from template

Create a project pre-populated with the necessary files to get you started quickly.

Import project

Migrate your data from an external source like GitHub, Bitbucket, or another instance of GitLab.

Run CI/CD for external repository

Connect your external repository to GitLab CI/CD.

You can also create a project from the command line. Show command

TODO: Write down the bug report

1. As you have now encountered the bug while testing,
2. You do need to start writing the bug report
3. Open the file 02_ProjectPageReport.md
4. Follow the instructions in the 01_Template_BugReport.md file
